About Me

A skilled network engineer with hands-on experience at GoDaddy, proficient in utilizing JavaScript to optimize network performance, enhance security, and ensure seamless operations. Seeking to leverage expertise in network infrastructure management and troubleshooting to contribute effectively to GoDaddy's mission of empowering individuals and businesses with innovative online solutions.

Professional Experience

Dial Back | Software Engineer

2024– Present

Key responsibilities:

- Developed and maintained JavaScript codebase using Visual Studio for web applications hosted on GoDaddy servers.
- Implemented efficient algorithms and data structures to optimize code performance and improve user experience.
- Collaborated with cross-functional teams to troubleshoot and debug issues, ensuring timely resolution and minimal downtime.
- Utilized version control systems such as Git to manage code repositories and facilitate seamless collaboration among team members.
- Deployed code updates to GoDaddy servers using FTP or other deployment tools, ensuring smooth deployment processes and minimal disruption to live applications.
- Conducted code reviews and provided constructive feedback to team members to maintain code quality and adherence to best practices.
- Stayed updated on latest JavaScript trends, frameworks, and tools to continuously enhance development processes and deliver cutting-edge solutions.
